Note: None of the Directors on Infomerics Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.

Rationale

Infomerics Ratings has assigned its 'IVR BBB/Stable' ratings to the Rs. 200 crore non-convertible debentures (proposed) of Regency Fincorp Limited (RFL) and has reaffirmed its "IVR BBB/Stable" ratings on the bank facilities and other debt instruments.

Earlier on July 21, 2026, Infomerics Ratings has upgraded its ratings mainly driven by successful strategic shift towards secured MSME lending, which has resulted in a healthier portfolio composition, robust AUM expansion, improved profitability and operating efficiency, and a stronger capital base supported by periodic equity infusions. The upgrade was further supported by the company's diversified funding profile, demonstrated ability to raise resources from multiple lenders, and its growing market position in the MSME lending segment.

The ratings continue to derive strength from the experienced management team, established credit appraisal and risk management framework, granular borrower profile, comfortable capitalisation supported by a strong CRAR, adequate liquidity position with a well-matched ALM

profile, and healthy asset quality indicators. However, the ratings remain constrained by the company's moderate scale of operations, geographical concentration of the loan portfolio, and the limited seasoning of the rapidly growing secured MSME portfolio. The ratings also factor in the competitive nature of the MSME lending industry and execution risks associated with the company's planned business expansion.

Outlook: Stable

The Stable outlook reflects the company's ability to sustain growth while maintaining comfortable capitalisation, healthy profitability, and prudent asset quality, supported by its secured MSME focus and strong risk management framework.

Analytical Approach

Approach	Comments
Consolidation/ Standalone	Standalone
Parent/ Group Support	Not Applicable

Key Rating Drivers with Detailed Description

Strengths

- **Successful transition towards secured MSME lending**

The company has successfully executed its strategic transition towards secured MSME lending during FY26. The share of secured MSME loans increased significantly to 61.05% of the total AUM as on March 31, 2026, from 17.75% as on March 31, 2025, while the share of the legacy JLG portfolio declined to 10.73% in FY26 from 17.25% in FY25. With fresh JLG disbursements discontinued, future business growth is expected to be driven primarily by secured MSME lending, supplemented by digital lending initiatives.

This shift in portfolio composition is expected to strengthen the company's overall credit profile by improving collateral coverage and reducing portfolio risk over the medium term. Going forward, the performance and seasoning of the expanding secured MSME book alongside the maintenance of healthy asset quality metrics which will remain a key rating monitorable.

- **Improvement in profitability and operating efficiency**

The company has demonstrated strong business growth and improving operating performance, driven by its strategic shift towards secured MSME lending, deployment of

capital raised through periodic equity infusions, and expansion of its distribution network. Consequently, the on-book AUM increased by 53.38% to Rs.261.23 crore as on March 31, 2026, from Rs.170.18 crore as on March 31, 2025, and further increased to Rs.345.24 crore as on June 30, 2026, reflecting sustained business momentum. The higher share of interest-earning assets, coupled with improved lending spreads and operating leverage arising from the rapid scale-up of operations, resulted in improvement in profitability. Accordingly, NIM improved to 11.72% in FY26 from 8.27% in FY25, while cost-to-income ratio improved to 34.03% in FY26 from 49.52% in FY25. The stronger operating performance also translated into an improvement in ROTA to 4.95% (FY25: 2.68%) and RONW to 9.42% (FY25: 5.78%). Going forward, the company's ability to sustain its profitability while maintaining asset quality amid its planned business expansion will remain a key rating monitorable.

- **Comfortable capitalisation**

RFL's capitalisation profile continues to remain comfortable, marked by an overall CRAR of 57.62% as on March 31, 2026 (March 31, 2025: 64.35%) and 49.77% in Q1FY27, which remains above the regulatory requirement backed with robust business growth during the year. The company's tangible net worth increased to Rs.160.50 crore as on March 31, 2026, from Rs.121.84 crore as on March 31, 2025, and further to Rs 181.84 crore in Q1FY27, supported by conversion of preferential warrants into equity shares and healthy internal accruals. The company has already raised Rs.25 crore through CCDs during Q1FY27 and proposes to raise an additional Rs.50–75 crore through equity during FY27 to support its planned business expansion while maintaining comfortable capitalisation. Infomerics Ratings expects the company's capital profile to remain comfortable over the medium term, supported by timely capital augmentation.

- **Comfortable asset quality**

Despite the loan portfolio increasing by 53.38% during FY26, the company's asset quality remained comfortable, with GNPA and NNPA at 0.99% and 0.74%, respectively, as on March 31, 2026 (FY25: 0.42% and 0.32%) and 0.98% and 0.74% in Q1FY27. Product-wise analysis indicates that around 81% of the total GNPA originates from the legacy JLG portfolio despite it constituting only around 11% of the total AUM, while the newly built secured MSME portfolio has so far exhibited satisfactory asset quality. Going forward, the company's ability to maintain healthy asset quality as the secured MSME portfolio seasons will remain a key rating monitorable.

Weaknesses

- **Moderate scale of operations despite healthy business growth**

Despite registering healthy business growth during FY26, the company's scale of operations remains moderate compared with established NBFC peers, with an on-book AUM of Rs.261.23 crore as on March 31, 2026 (March 31, 2025: Rs.170.18 crore). The relatively moderate scale limits operating efficiencies, funding diversification and pricing flexibility compared with larger NBFCs. Although the company has demonstrated strong execution over the last two years, the projected scale-up in operations would require sustained access to capital, diversified funding sources and continued maintenance of prudent underwriting standards and asset quality. The company's ability to achieve the envisaged growth while preserving its profitability and capitalisation profile will remain a key rating monitorable.

- **Moderate geographical concentration**

The company's portfolio continues to exhibit moderate geographical concentration, with Punjab (24.30%), Chandigarh (22.37%) and Delhi (19.71%) together accounting for around ~66% of the total AUM as on March 31, 2026. Such concentration exposes the portfolio to region-specific economic conditions, competitive intensity and regulatory developments, which could have an adverse impact on business growth and asset quality. Although the company has gradually diversified its presence into Haryana, Uttar Pradesh and Uttarakhand during FY26, the portfolio continues to be concentrated in North India. The company's ability to further diversify its geographical profile while maintaining healthy portfolio quality will remain a key rating monitorable.

- **Limited seasoning of expanding secured MSME portfolio**

The secured MSME portfolio increased significantly from Rs 30.20 crore as on March 31, 2025, to Rs 159.47 crore as on March 31, 2026. While the portfolio has demonstrated satisfactory asset quality so far, a substantial portion of the book remains relatively unseasoned. Accordingly, its repayment behaviour and asset quality performance over the next few quarters will remain a key monitorable.

Liquidity – Adequate

RFL's liquidity profile is adequate, supported by comfortable capitalisation, a well-matched ALM profile and access to bank working capital lines. The ALM statement as on March 31, 2026, reflected no negative cumulative mismatches up to the 5-year bucket. Free cash and cash equivalents stood at Rs. 13.33 crore as on March 31, 2026 (cash and bank balances: Rs 11.23 crore; liquid investments: Rs 1.42 crore; unutilised bank limits: Rs. 0.68 crore). However, given the company's rapid business expansion, growth continues to be primarily funded through external borrowings, with average working capital utilisation remaining at around 77% over the trailing 12 months.

Rating Sensitivities:

Upward Factors

- Sustained growth in the loan portfolio while maintaining comfortable asset quality, profitability and capitalisation, along with continued diversification of the geographical profile and successful seasoning of the secured MSME portfolio.

Downward Factors

- Substantial and sustained deterioration in asset quality, leading to weakening of profitability or capitalisation.
- Lower-than-expected business growth, inability to raise capital or mobilise funding as envisaged, or any significant increase in leverage that adversely impacts the company's financial profile.

About the Company

Regency Fincorp Limited (RFL) is an RBI-registered, listed, non-deposit taking NBFC primarily engaged in providing secured MSME loans, unsecured MSME loans, small-ticket personal loans and legacy Joint Liability Group (JLG) loans. The company has strategically repositioned its portfolio towards secured MSME lending while also expanding its digital lending capabilities through its 'Cash My Salary' platform. As on March 31, 2026, the company operated through 23 branches across 8 states/UTs with an on-book AUM of Rs 261.23 crore.
